Matthew Bidewell

Senior Member of Technical Staff (SMTS)
London, UK · matty.dev · GitHub

SUMMARY

Senior Software Engineer with around 10 years of experience building reliable APIs, cloud services, and developer tools with TypeScript, Node.js, and Go. Leads delivery from product definition through implementation, combining hands-on engineering with cross-functional technical leadership. Recent work spans dynamic content platforms, low-latency delivery, customer-facing AI capabilities, and AI-assisted development workflows.

EXPERIENCE

Contentful (Salesforce) - Senior Member of Technical Staff

June 2025 – Present
Acquired by Salesforce in September 2026.
contentful.com

- Tech-led dynamic Experiences from PRD to delivery, coordinating a six-person team with product and design and owning technical implementation.
- Built reusable, GraphQL-powered Experiences that replaced manual content replication; beta design-partner participation grew 10× during the programme.
- Implemented caching in the delivery pipeline and APIs, reducing request latency from approximately 400 ms to 100–200 ms.
- Helped deliver Native External References using Cloudflare to resolve customer APIs within content delivery, with an estimated 25% increase in feature adoption.
- Created AI skills integrated with Contentful MCP to enable AI-first Experience creation.
- Helped build a team-scoped AI development kit that turns PRDs into Jira tasks and agent-generated PRs, with human review.

Beamery - Senior Software Engineer

February 2023 – June 2025 · London, UK
beamery.com

- Rebuilt the ETL pipeline using NestJS, Kafka, TypeScript, and Kubernetes, increasing ingestion success from approximately 17% to near 100% while reducing costs by 55%.
- Diagnosed and resolved critical bugs in the legacy GoLang ETL pipeline while maintaining system stability.
- Led the “Backend Tribe” community initiative to foster knowledge sharing and improve developer experience across engineering teams.
- Conducted technical interviews and contributed to engineering hiring decisions.
- Delivered technical presentations as a company representative at the London NodeJS Usergroup.

Government Digital Services - Software Engineer

January 2022 – February 2023 · London, UK
gov.uk

- Architected and implemented the core identity verification platform using AWS Lambda, DynamoDB and TypeScript, now serving millions of UK citizens across major government services.
- Led technical migration from Java serverless functions to NodeJS serverless functions, reducing cold start times by up to 40%.
- Developed and maintained critical open-source packages used across multiple government departments, improving cross-department code reuse.
- Founded and facilitated monthly GDS NodeJS community meetups, fostering knowledge sharing across 50+ engineers.
- Authored comprehensive technical RFCs and Architecture Decision Records (ADRs) that established serverless and NodeJS as the standard for new government services.
- Championed modern development practices through the implementation of automated testing and CI/CD pipelines.

A Million Ads - Senior Software Engineer

January 2020 – January 2022 · London, UK
amillionads.com

- Led five engineers in decomposing a monolithic backend into microservices.
- Built a real-time analytics platform processing 100+ million records daily using Node.js, Elasticsearch, AWS Firehose, and S3.
- Reduced ad-generation latency from 200 ms to under 100 ms using Rust and TypeScript.

A Million Ads - Software Engineer

April 2018 – January 2020 · London, UK
amillionads.com

- Built Node.js and TypeScript services that scaled from 1 million to 100+ million daily requests.
- Designed an adaptive scaling algorithm using historical traffic patterns.

Future Shop - Web Developer

January 2017 – April 2018 · London, UK
futureshop.co.uk

- Developed and maintained an e-commerce solution using the Magento platform.
- Implemented responsive web designs using HTML, CSS, JavaScript, and PHP.

EDUCATION

University of Hertfordshire

September 2013 – June 2016 · Bachelors of Science
Computer Science - Software Engineering and Web Development
2:1

PROJECTS

ScreenForge - Creator & Maintainer

ScreenForge on matty.dev

- Built an exploratory application that turns uploaded website screenshots into single-page websites, using an AI model to generate self-contained HTML, CSS, and JavaScript.
- Implemented screenshot upload, structured model-output validation, and persistence; published generated sites to isolated, no-egress Cloudflare Dynamic Workers with shareable URLs.

NodeJSByExample - Creator & Maintainer

nodejsbyexample.dev

- Created and maintain an educational platform teaching NodeJS through annotated, practical examples.
- Developed comprehensive, hands-on learning materials focusing on NodeJS patterns and best practices.
- Open-source project showcasing real-world NodeJS implementations and common design patterns.

Personal Blog & Portfolio

matty.dev

- Designed and maintained a personal technical blog focused on software engineering insights.
- Authored technical articles on cloud architecture, NodeJS, and software development best practices hosted on here and medium.com

TECHNICAL SKILLS

Languages & Frameworks

- TypeScript, Node.js, JavaScript, Express, Go

Cloud & Infrastructure

- **Cloud:** AWS, GCP, Cloudflare Workers
- **Infrastructure:** Kubernetes, Terraform, Serverless, Dynamic Workers
- **Message Queues:** Kafka, AWS SQS, GCP PubSub

Databases & Storage

- **Databases:** DynamoDB, MySQL, Redis, MongoDB
- **Storage:** S3, GCP Cloud Buckets, Cloudflare R2, KV, ElasticSearch

APIs & Data Delivery

- **APIs & Protocols:** GraphQL, Contentful Content Delivery API (CDA), Model Context Protocol (MCP)
- **Patterns:** ETL pipelines, API integrations, API response aggregation, delivery caching

AI & Developer Tools

- Cloudflare Workers AI, Codex, Claude, Glue, AI skills, agentic development workflows, AI-assisted PR generation and review

Development & Testing

- **Testing:** Jest Integration Testing, E2E Testing
- **Monitoring:** Grafana, PagerDuty
- **Documentation:** RFCs, ADRs, Technical Writing
